

ConnectionInfoListener

GroupInfoListener

cs.nsense.location.WifiAccessPoint

```
classDiagram
    class ConnectionInfoListener
    class GroupInfoListener
    class WifiAccessPoint["cs.nsense.location.WifiAccessPoint"]
    WifiAccessPoint --> ConnectionInfoListener
    WifiAccessPoint --> GroupInfoListener
```

The diagram illustrates a class hierarchy where the class `cs.nsense.location.WifiAccessPoint` inherits from both `ConnectionInfoListener` and `GroupInfoListener`. This is represented by two upward-pointing arrows originating from the `WifiAccessPoint` box and pointing to the boxes for `ConnectionInfoListener` and `GroupInfoListener`.
