

ConnectionInfoListener

GroupInfoListener

cs.usense.location.WifiAccessPoint

```
classDiagram
    class ConnectionInfoListener
    class GroupInfoListener
    class cs_usense_location_WifiAccessPoint["cs.usense.location.WifiAccessPoint"]
    ConnectionInfoListener <|-- cs_usense_location_WifiAccessPoint
    GroupInfoListener <|-- cs_usense_location_WifiAccessPoint
```

The diagram illustrates a class hierarchy. At the top, there are two classes: `ConnectionInfoListener` on the left and `GroupInfoListener` on the right. Below them, centered, is the class `cs.usense.location.WifiAccessPoint`. Two vertical arrows point upwards from the `cs.usense.location.WifiAccessPoint` box to the `ConnectionInfoListener` and `GroupInfoListener` boxes, indicating that `cs.usense.location.WifiAccessPoint` inherits from both of them.
